

At Alumet Ltd we recognise the importance of minimising any adverse effects our operations may have on the environment. We will take a proactive, systematic approach to balancing our business and environmental responsibilities.

We are committed to complying fully with all relevant environmental legislation at local, regional and national level and to continually improving our environmental performance through in-house initiatives, procedures, provision of resources and training. We are also committed to complying with all other requirements to which Alumet subscribes e.g. the desires of clients and best practice in the industry.

We will endeavour to:

- Operate processes that reduce, reuse and recycle waste and where this is not currently practicable, provide or use environmentally sound treatment or disposal methods
- Reduce our energy consumption
- Minimise the impacts on the local community during our operations
- Reduce the impact of our transport activities
- Prevent pollution and continually improve our environmental performance

Alumet will set environmental objectives to assist with meeting the above, at the annual management review meeting. These will be measurable, where possible and shall be reviewed on a regular basis.

The board will monitor the effectiveness of this policy and the objectives set against it. This policy will be communicated to all employees and made available to external parties via the Alumet website.

This policy will be reviewed annually.

B Summers
